

NCS Colourpin II for product brands

NCS Colourpin II is a small, accurate and wireless colour reader to engage customers with a brand. Colourpin II offer the latest innovations in colour measurement technology, neatly package in a small device suitable for creative users as well as colour sales.

The wireless colour reader enables you to define colours on any surface or object. Connected to a smartphone app it also enables you to store colours, build and share your own colour library,

- Boost consumer confidence & satisfaction
- Engage customers & build brand loyalty
- Enable user insights
- Drive traffic to your product websites

Ideal as retail product and as a sales tool for product brands within decorative coatings, industrial coatings, building materials and other product brands where colour is decisive when making purchase decisions.
